

DETERMINATION OF MASS PER UNIT VOLUME OF FRESHLY MIXED CONCRETE AS 1012.5

This standard sets out the method for determining the mass per unit volume of freshly Mixed concrete which is in the plastic state. The standard provides for the compacting of The sample either by rodding or vibrating.

CL10090

CL10090 UNIT MASS

The Civilab Unit Mass measure is manufactured from heavy gauge steel to enable it to retain it's rigidity and maintain it's shape. It has an inside diameter of 250mm and inside height of 280mm. The measure is fitted with two carrying handles and the top rim is machined to a planed surface perpendicular to the axis of the cylinder.

FG-30KAM

FG-K HANDLE

FG 30KAM PLATFORM SCALE

A rugged electronic platform balance capacity 30kg x 10gms complete with a stainless steel weighing pan for wash down applications. The balance is fitted with overload protection and offers reliable weighing accuracy. Rough, tough weighing is handled with incredible ease. Meter head tilts and rotates on the column for best viewing angle. Choice of battery or AC adaptor available.
