

DETERMINATION OF THE PENETRATION RESISTANCE OF A SOIL - AS1289.6.3.2 DYNAMIC CONE METHOD

CL24320 DYNAMIC CONE PENETROMETER

The Civilab DCP is a rugged Australian made piece of equipment with a proven track record. The hammer assembly is a separate unit to which 900mm long graduated rods can be attached. The complete unit includes:

- 1 x hammer assembly
- 3 x 900mm long rods
- 1 x conical tip
- 1 x flogging piece

Note: The CL24320 can be used as a PERTH SAND PENETROMETER by adjusting the weight drop and using the CL24310/02 blunt tip.
